Win the CAD War with open innovation Last year we announced that Autodesk invested \$75 million in Autodesk Design Review, a company that strives to help you bring your ideas to life. So far, we've invested another \$75 million in Design Review Labs, and we're ready to add more investments to the pot and expand our portfolio of partners and advisors. Our approach is simple: we believe in open innovation, and that means sharing our tools with other companies, while respecting their intellectual property. Autodesk Design Review is part of Autodesk's CAD War strategy. In the next year, we're planning to double the size of the CAD War portfolio, invest in third-party CAD technology like Graphisoft's CACIS, and we're planning to bring Design Review Labs into the fold, expanding the capability of Design Review and bringing the capabilities of AutoCAD to a broader community of startups, engineers, and designers. Since the announcement last year, we've met with over 70 companies across multiple sectors who are looking to support the open source project, Design Review, that makes design collaboration easy and efficient. Together, we're working to expand and enrich the capabilities of Design Review. We're continuing to develop and incorporate feedback from the community, refining tools and services to help more people—and more companies—power their work. For more information about how we are investing in Design Review, read this blog post. See what's coming in AutoCAD 2023 While we
