

LORENTZ COMPASS 3.0.10.9 121

lorentz compass 3.0.10.9 121z Posted by DmitryK Â» 28 May 2010, 15:09 Good day! I installed navigation, everything is fine, it works, but I canâ€™t bind the route to coordinates. When trying to bind a route to coordinates, a message pops up: "The anchor point could not be found because there is no such point on the map" Can anyone suggest what can be done? Thanks in advance! I am attaching the map file. Version: 3.1.0 (build 8148) Languages: Russian, English, Ukrainian Size: 13,7 GB Re: lorentz compass 3.0.10.9 121z
